The text files should be prepared using MS Word or Rich Text Format (RTF) and should be clearly labeled with the author's names, file name, and software program. A hardcopy printout that exactly matches the electronic version must be supplied. Each manuscript must be accompanied by a statement that it has not been published elsewhere and that it has not been submitted simultaneously for publication elsewhere. Authors are responsible for obtaining permission to reproduce copyrighted material from other sources and are required to sign an agreement for the transfer of copyright to the publisher. All accepted manuscripts, artwork, and photographs become the property of the publisher.

### 5. Manuscript Review

Manuscripts are evaluated by anonymous peer reviewers. Authors are notified of the disposition of a manuscript four weeks after receipt.

### 6. Types of papers

BJMG contains three types of publications: review articles, original papers and short communications. Review articles on all aspects of medical genetics are welcome. The editors encourage researchers from Balkan and other countries to submit original manuscripts to ensure a broad coverage of diverse aspects of the medical genetics. Letters to the Editors should not exceed 40 typewritten lines of manuscript text.

### 7. Preparation of manuscript

- All manuscripts must be written in English (the Vancouver style) and the text typed double spaced on one side of the paper only with wide margins of at least 2.5 cm on all four sides. Uniform requirements for manuscripts may be found in Br Med J 1991; 302:338-341, and N Engl J Med 1991; 324: 424-428.

- The title page should contain: title of article, abbreviated running title of no more than 30 characters, author's name, department, institution, city and country, name and full postal address, telephone, telefax and e-mail of the author responsible for correspondence. Number all pages, beginning with title page.

- The abstract of no more than 250 words should start on page 2. A list of 3-6 key words or short phrases should be given in alphabetic order below the abstract.

- The main text should be arranged in the following components: introduction, materials and methods, results, discussion, acknowledgments, figure legends, tables. Include as a footnote the information about grants. Cite each reference, figure and table in numerical order - ex.[1-5]; (Table 1); (Fig.1).

- References should not exceed 30-40 in number. Number references in order in which they are first mentioned in the text. The surnames of all authors followed by initials should be given. Abbreviate journal names in accordance with the Index Medicus system (Br Med J 1988;296:401-405).

*Examples:* Du Manoir S, Speicher M, Joos S, Schroc E, Popp S, Dohner H, Kovacs G, Robert-Nicaud M, Lichter P, Cremer T; Detection of complete and partial chromosome gain and losses by comparative genomic in situ hybridization. Hum Genet 1993; 90:590-610.

- Place all the tables at the end of your file. Start each table on new page, complete with title and footnotes (if any). Number the tables (Arabic numerals) in the order in which they are cited in the text. Always separate the individual columns using tabulators, not using the space bar.

- Figures should be prepared on separate pages. Number the figures in Arabic numerals in the order in which they are cited in the text. Figures should be labelled with the number, first author's name and title of the paper in pencil on the back please also indicate the top of the figure.

- Please send us only the final updated version of the file on your disk.
